

Notice to all Participants,

**Clause 301B and 301C recalculation threshold values.**

Under clauses 301B (1) and 301C (1) of the Retail Market Procedures (South Australia), AEMO must after consultation with all participants publish threshold values for the following:

- Swing service recalculation threshold value;
- Gate point estimation recalculation threshold value.

Accordingly AEMO advises that the value for the above thresholds is **2TJ**.

This value is effective from 20<sup>th</sup> February 2008 when the above clauses became operational in the REMCo Retail Market Rules version 5.6.
